ECU School of Social Work Professional Development Lecture Series

We are pleased to announce the tenth year of the ECU School of Social Work Professional Development Lecture Series. The School of Social Work developed this series to serve the continuing education needs of ECU alumni, practicing social workers, and other professionals in the human services field. In addition, this series was designed to enhance the educational opportunities for our students in the field. It is also a way to give back to our field instructors, who provide service to our school through their ongoing support and training of our students in their internships throughout Eastern North Carolina.

Our lectures are presented by faculty and community professionals who are experts in their field. This upcoming year, we have planned a series of workshops on a variety of topics. For registration information, please call 252-328-9198 or go to the ECU Continuing and Professional Education website https://cpe.ecu.edu/

All of the workshops will take place at the East Carolina Heart Institute (115 Heart Drive, Greenville, NC) and will be held from 12:00noon until 2:00pm. Two contact hours of continued education (0.2 CEUs) will be awarded upon completion. The cost of each workshop is $25.00. The discounted cost for students and field supervisors is $5.00 per workshop.
